

Environmental Plan DRAG CHALLENGE 2025

Gardermoen Raceway

Environmentally responsible

Mona Modahl

Household waste

Upon registration in the secretariat, each team is given garbage bag(s) for use for household waste. There are always garbage bags available, should teams need more during the Event. Only transparent garbage bags are allowed!

The team is responsible for ensuring that household garbage is placed next to the dumpster when needed. This should be sorted. Upon departure ALL RUBBISH must be removed by teams at designated places, we have garbage container, glass and metal waste and special container for oil spills etc. Garbage container is located on the right side of toilets/showers and small kiosk.

Special waste

Waste oil and other environmentally hazardous waste MUST be delivered in special container located in area left side of toilets and showers. Waste oil and hazardous waste will be transported out of the area, if such exist after the end of the race weekend. All labelling is carried out in accordance with regulations.

In case of violation of the above, an invoice will be sent from the organizer. If the organizer has to sort waste, this invoice will accrue NOK 1000,-. If the organizer has to remove rubbish and other things by team, the invoice will accrue NOK 2000,-. It will also mean that the organizer will implement an environmental fee for all performers of NOK 500 at the next event.

Pit Silence

24:00 – 08:00

Starting up competing vehicles is forbidden 22.00 - 08.00
